OP-22
A structural measure reflects the environment in which providers care for patients. Structural measures assess characteristics linked to the capacity of the provider to deliver quality healthcare. CMS believes requesting structural measures information will encourage facilities to increase the use of tools, ultimately improving the quality of care provided to Medicare beneficiaries.

Web-Based measures assess characteristics linked to the capacity of the provider to deliver quality healthcare. CMS believes reporting Web-Based measures information will encourage facilities to improve the quality of care provided to all patients.

Meaningful Use (MU) is a CMS Medicare and Medicaid program that awards incentives for using Certified Electronic Health Record Technology (CEHRTs) to improve patient care. To achieve Meaningful Use and avoid penalties, providers must follow a set of criteria that serves as a roadmap for effectively using an EHR.
