

Steps for Exporting Abstractions

To export abstractions:

1. From the Abstractions screen, select the desired abstractions.

Abstractions Screen

The screenshot shows a web application window titled 'Patient' with a sub-tab 'Abstraction Search'. The main area is titled 'Abstractions' and contains a 'Search Criteria' section with three dropdown menus for 'Field Name', 'Condition', and 'Field Value', along with 'Search' and 'Clear' buttons. Below the search criteria is a pagination control showing '(1 - 234) of 234'. The main content is a table with the following data:

First Name	Last Name	Hospital Patient ID	Admission Date	Discharge Date	Measure Set	Abstraction Status	Provider	Abtractor ID
Abc	Def	001	08-01-2013	08-09-2013	SCP	PENDING	Hospital_1	Admin_1
Abc	Def	001	08-01-2013	08-09-2013	AME	COMPLETE	Hospital_1	Admin_1
asadphgan	xxxxhhghghgh...	h0tgcdfkacq	04-12-2013	04-24-2013	AME	PENDING	Hospital_2	od

At the bottom of the screen, there are five buttons: 'Edit Abstraction Information', 'Edit Abstrad', 'Duplicate Case', 'Export', and 'Delete Abstraction'.

To easily identify the cases, you can sort by any of the fields displayed. To toggle between ascending and descending order of the field, click on the field name and an arrow will appear next to the field name. To reverse the sort, click on the field name again.

2. Click **Export**. The Abstraction Export screen appears.

The system defaults the file type to XML, the measure type to CMS Measures, the Export Type to CMS, the action type to Add, and the location to an export subfolder of the directory where CART – Inpatient is installed. Change the selections as desired.

3. Select a File and Action Type and click **Finish**.

Abstraction Export Screen

****Choose the zip file to upload several abstractions simultaneously**

Exporting abstraction (22) 190079_1639_20100514AMI_32378.xml

Cancel

5. When the export is complete, an Export Statistics window displays.

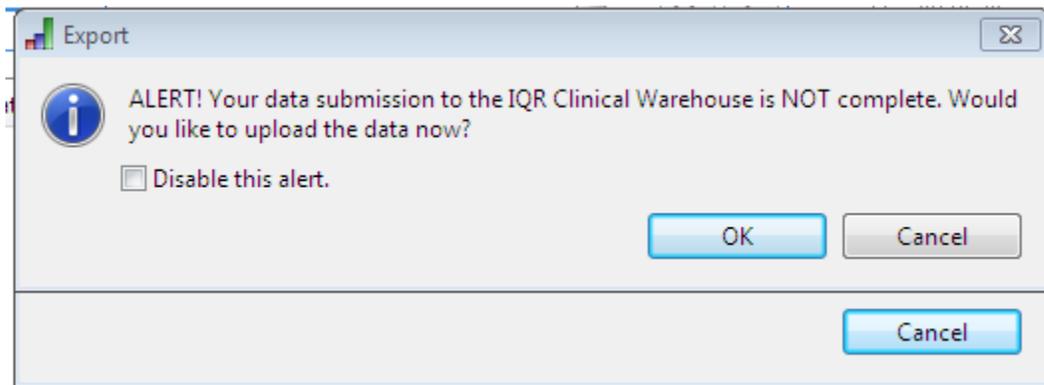

Export Statistics Message

Export Statistics

The export process has completed.

Statistics >> Close

6. Click **Statistics** to view the results of the export. Information displayed includes:
 - The location where the export files were saved
 - The total number of abstractions exported
 - The total export time for the abstractions
 - The average export time per abstraction in milliseconds
7. Click **Close** to close the statistics message.

If you click "OK", it will take you to the Quality Net log-on page. If you already have Quality Net pulled up/logged in, select cancel or you can also disable the alert.
